

Session-1

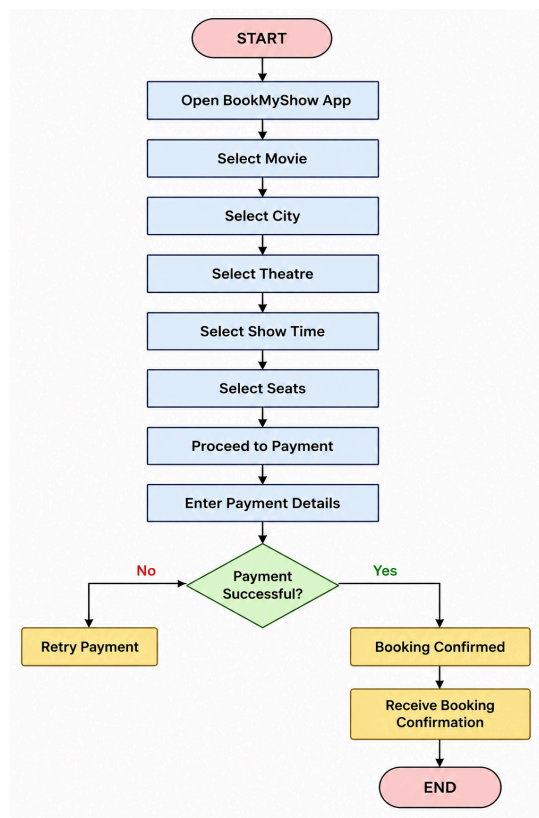

Task:1

A program is a set of instructions written in a programming language that tells a computer what to do. It helps the computer perform specific tasks such as calculations, storing information, or displaying results just like we use instagram where a photo is posted and the likes get updated.

Task:2

- a. Java- Compiled
- b. Python- Interpreted
- c. Javascript- Interpreted

Task:3

Task:4

1. Start.
2. Open the Swiggy app.
